Betagen Crème

To the rescue

Often described as an ‘ambulance’ in a jar, attending to skin emergencies. Particularly sensitive, irritated or inflamed skin as it almost immediately boosts the skin’s immune defenses and reduces swelling, redness and inflammation. Allowing healthier skin cells to fight back.

Restore skin back to a healthy glowing complexion.

Good for premature aging, environmentally stressed skin, sun damaged skin, eczema, psoriasis and anyone who needs increased healing and skin regeneration.

Unique characteristics and benefits

Contains powerful antioxidants OPC’s, which are 50 times more powerful than vitamin E. These antioxidants speed up the healing process whilst reversing the effects of aging. This unique crème contains Beta Glucan, an active ingredient extracted from the cell wall of certain yeasts. Beta Glucan is anti-inflammatory and an immunological agent, which stimulates skin’s natural immune defence system. For maximum performance betagen crème contains the most potent beta-glucan B-6 yeast wall extract.

Betagen crème with its unique transdermal delivery works on a cellular level not superficially, meaning it delivers ingredients directly to each cell, which ensures maximum benefit. On the other hand, superficial products remain on the surface of the skin and do not penetrate through to reach new skin cells. To improve skin function and increase the cells metabolism, new cells need to be nourished to function optimally and to enhance re-generation

This amazing formula is also available in a non-oily serum that contains all the benefits of the crème that is perfect for people with oily or acne prone skin. Beta gel serum can be added to other Danné crèmes to provide the skin with an added boost.

Recommended Retail Price:

Product	Size	Retail Price
Betagen crème		
Beta Gel		

Betagen crème and Beta gel are available through all Danné clinics.
