Enzyme Therapy

Danné enzyme treatments work with the skin where cosmetic facial treatments only act on the surface of the skin.

Enzymes work on skin functioning, increase blood flow and bring fresh supply of nutrients and oxygen that is essential for tissue health and repair. The lymphatic system is enhanced acting like an internal sprinkler flushing fresh fluid into the cells and cellular spaces while cleaning out debris and gases. Enzyme 1 strengthens the structural integrity and rebalances the skin encouraging proper skin functioning and a healthy environment for cells to live and thrive in.

If we think of the skin like a factory and it is not functioning properly the product it produces will be weak and of poor quality, the product in this case is the skin you see. *The skin is a mirror of what is happening internally.*

The enzyme treatments stimulate fresh blood flow to the new tissue bringing vital nutrients and supreme oxygenation. Think of the skin as a factory, the better that factory is functioning the better the product it produces which is the skin you see on the top.

Peeling alone does not produce a stronger healthier more youthful skin. Removing all the old damaged skin, strengthening and repairing the new skin coming through, protecting it and maintaining good skin functioning is the key to long term healthier younger looking skin.

Enzyme treatments work with the skin not merely act on it. This enzymatic combination consumes dead cell material cleans out debris and gases in the cells, exercise facial muscles and firms the skin. It opens up the vascular system bringing new oxygen to the skin cells and encouraging the formation of new elastin and collagen. Danné enzyme treatments tighten, tone and firm the skin.

To finish after the masque is removed we do a TRANSDERMAL NUTRITION INFUSION with our unique transdermal delivered products. Vitamin C serum, Betagel, Biogen C crème (the *wrinkle relaxer*) and fine line crème around the eye.

We can effectively deliver into a cellular level a rich blend of herbal lipids, proteins, amino acids, vitamins, anti-oxidants and nutrients enabling cells to stay alive longer and perform at their healthiest youngest level.

Danné Enzyme Therapy is available through all Danné clinics

For your nearest stockist contact Danné SA 011 262-6120

We then lock all these wonderful ingredients in with hydrophilic crème, which also supremely hydrates the skin by holding maximum amounts of water in the epidermis.

Danné treatments work with the skin rather than merely acting on it.

Our transdermal delivery ensures we get the active ingredients to the target area where they can have a therapeutic effect and keep optimal skin functioning. You can have all the most wonderful active ingredients but without an effective delivery system they are just sitting on the top not really supplying new baby cells with any real benefit.

With Danné skin therapy the opportunity for youthful healthy skin has never been better!

Enzyme application

WHO CAN HAVE THIS TREATMENT - Everyone can benefit.

BENEFITS - How the skin will look after a treatment

AMAZING!

- Firmer and tighter
- Cleaner and fresher
- Plump and more supple
- Clearer and brighter
- Fine lines and wrinkles will be reduced

SEE AND FEEL THE DIFFERENCE!
