Don't leave your skin high Herb and Mineral Mist

Quench your skins thirst with Danné Herb and Mineral Mist.

Q: What makes Danné Herb and Mineral Mist more effective than other water sprays?

A: Most water is alkaline, and skin repels alkaline water, therefore normal water sprays will not actually penetrate into the skin because of incorrect pH. The Danné Herb and Mineral mist is pH adjusted so the skin will readily accept it. It is polarised which ensures it will penetrate into the skin where it can truly restore the vital moisture. Herb and Mineral mist is like a life force drink for the skin containing essential vitamins minerals and water that are effectively delivered into the skin.

Q: How often should you use Herb and Mineral mist during a flight?

A: Approximately every two hours. On a short one hour flight use before and after the flight.

Q: What are the benefits of using Herb and Mineral Mist?

A: Herb and mineral mist will re-hydrate the skin restoring vital moisture. Restores and rebalances a healthy acid mantle, the acid mantle is the skins protective defence against harmful invaders.

Other unique properties herb and mineral mist provide the skin are anti-inflammatory, astringent to refine open pores, antioxidants to fight the damaging effects of free radicals, antibacterial, refreshing cooling and revitalising. For all skin types both male and female.
